

October is National Cyber Security Awareness Month

ICT's Student Technology and Planning group kicked off National Cyber Security Awareness Month with an information table on October 4th. The team handed out popcorn and flyers with cyber security tips to NMSU students on the International Mall. Students also had the opportunity to win prizes by correctly answering cyber security questions.

Fire Prevention Week is October 9-15, 2016

This year's Fire Prevention Week campaign, "Don't Wait – Check the Date! Replace Smoke Alarms Every 10 Years," represents the final year of a three year effort to educate the public about basic, but essential elements of smoke alarm safety.

The NMSU Fire Department wants to remind you it is important to check smoke alarms and carbon monoxide detectors every month to ensure they are in working condition. If you do not have smoke alarms or carbon monoxide detectors in your home off campus, we strongly advise you to pick up a few at a local home improvement store. For more fire prevention and safety tips, visit <https://fire.nmsu.edu/prevention-safety/>.

The Association for Computer and Network Support (ACANS) events

ACANS is a university-wide organization for individuals who work with or are interested in technology at NMSU. On September 22, ICT held the annual ACANS meeting featuring the ICT leadership team who provided a summary of planned and completed technology activities. Topics included exploring management of computer labs' PC's by using Microsoft system center, identity management within central systems, and Apple's AirWatch for device management. After the meeting, ICT held a BBQ picnic for ACANS members and their families at Preciado Park.
