System Requirements:

Browser	Version	Operating Systems
Chrome* (*Preferred)	Latest Version	Windows / MAC / Android / IOS
Firefox	Latest Version	Windows / MAC
Safari	Latest Version	MAC / iOS

We strongly recommend upgrading to one of the supported browsers for using NMSU's Talent Acquisition System applications as well as for general internet security.

You may notice that the application may work in browsers other than those mentioned above. While this may be the case, where such functionality is upgraded, support of that functionality will then be realigned to our current supported browser commitments.

NOT SUPPORTED

Microsoft Internet Explorer (IE) - IE versions 11 and below are no longer being supported by Microsoft as of 17 August 2021. For more information refer to Microsoft's End of IE Support Announcement.

Do websites need to look the same in every browser?

No. A page needs to serve its purpose in function and not appear broken. It's not about browsers, it's about serving the users of our software by delivering content and capability that is valuable to them.

Support for mobile browsers

Mobile browsers are also included in the support matrix above. Where applicable using relevant PageUp's App (available in iOS App store & Android Play) is recommended for an optimal experience.
