

Self-Funding

- Medical, dental and vision plans can be paid for in one of two main ways;
 - Fully insured
 - Self-funded
- Neither approach is inherently better or worse
- Each has advantages and disadvantages
- Employers make decisions relative to which funding method to utilize for very different reasons
 - Typically, decisions are made based on risk tolerance vs. potential gains
- How much on average will an employer save with self-funding?
 - Pre-ACA, typically 2%-6%
 - Post-ACA, now 4%-9%
 - These ranges are over a long-term horizon; over a short-term, self-funding will cost employers more in years where adverse claims are incurred

Self-Funding

Cash Flow Timing at Beginning and End

- First year costs are “immature” due to lag in claim payments (first year medical costs may be 18% to 20% lower than a mature year) resulting in approximately 10 months of incurred and paid claims
 - Reduction in first year expense will help “fund” reserves (Incurred But Not Reported claims – IBNR)
 - Self funded plan sponsors must book this liability
- Employer gains benefit of float (weekly/monthly funding and IBNR)
- Second year costs are mature (i.e., twelve months of paid claims and expenses)

Pros and Cons of Self-Funding

PROS	CONS
<p> Cash flow advantages:</p> <ul style="list-style-type: none"> • Pay as you go approach • Maintaining reserves • Utilizing the float on claim payments 	<p> Acknowledged claim experience:</p> <ul style="list-style-type: none"> • Worse than average claim experience • A group with bad demographics may do better under fully insured arrangement
<p> Cost savings:</p> <ul style="list-style-type: none"> • No state premium tax • No ACA premium tax • Interest on funds otherwise held by the insurer • Avoid costly state mandated benefits 	<p> Budgeting the program:</p> <ul style="list-style-type: none"> • There will be monthly fluctuations • A strictly enforced budget could be an issue • PCORI and transitional reinsurance fee no longer bundled into the fully insured rates
<p> Plan control:</p> <ul style="list-style-type: none"> • Easier monitoring of claims costs • Claims data provided 	<p> Increased employer involvement:</p> <ul style="list-style-type: none"> • Verifying eligibility • Maintaining banking arrangements • Additional HIPAA responsibilities • Increased HCR reporting and filing • Essential Health Benefits definition
<p> Plan design flexibility:</p> <ul style="list-style-type: none"> • Not bound by state mandates • Customized benefits for your employees 	<p> Terminating the program:</p> <ul style="list-style-type: none"> • Self-funded back to fully insured is a double whammy; paying run-out plus paying fully insured premium
<p> Stability of self-funding:</p> <ul style="list-style-type: none"> • Employers rarely return to fully insured • Claims are claims: why pay more than what <i>your</i> claims are? 	<p> Fiduciary Responsibility:</p> <ul style="list-style-type: none"> • Employer may need to assume full liability; although Fiduciary options are available through TPAs

Pros and Cons

Impact to Active Employees and NMSU

PROS	CONS
<p>👍 Employees</p> <ul style="list-style-type: none">• More choice• Potential cost savings• Can choose how to spend their own money	<p>👎 Employees</p> <ul style="list-style-type: none">• Provider disruption• Network access• Change in plans/benefits
<p>👍 NMSU</p> <ul style="list-style-type: none">• Potential cost savings• Can design own benefits• More flexibility• Ease of administration• Cash flow• Trend mitigation• Better control of healthcare cost management• Control over impact of excise tax	<p>👎 NMSU</p> <ul style="list-style-type: none">• Communication• Potential for push-back from employees• Fiduciary liability• Establish reserves
