Fall 2010: OFS Customer Satisfaction Survey Results

About This Survey:

Near the beginning of the Fall semester, 2010, New Mexico State University's (NMSU) Office of Facilities and Services (OFS) and Office of Institutional Research, Planning, and Outcomes Assessment (IRPOA) worked together to update the 2009 OFS Customer satisfaction survey to account for organizational changes within OFS. The intent was that OFS could send the survey out to all faculty and staff on the Las Cruces campus as a follow up to the prior year's survey. It is anticipated that this will be an annual process. The survey was designed according to specifications of an OFS audit and standards set by professional organizations to which OFS belongs. A copy of the full survey can be found in Appendix A.

The survey was hosted on the IRPOA website, and OFS director Glen Haubold sent out a series of four email invitations asking the university community to take the OFS survey. The email distribution list was set up and determined by his office in conjunction with the University Communications Department at NMSU. The survey was made available to participants between September 20 and October 8, 2010

The survey itself dealt with six specific areas of university life that OFS is responsible for: custodial services, the environment inside of campus buildings, university grounds service and maintenance, environmental health and safety services, project development and engineering within university buildings, and OFS administrative services. Additionally, respondents were given the opportunity to write in specific comments they may have about OFS services on the last survey page. All respondents were asked for their opinions on custodial care, building and environment, and grounds and landscaping, but for the areas of project development and engineering, administrative services, and environmental health and safety services, respondents were given the option to opt out of that portion of the survey if they had not used the services in the prior 12 month period.

Fall 2010: OFS Customer Satisfaction Survey Results

General Response Rates and Results:

There was not a lot of publicity or build up prior to the start of the survey, but OFS has greatly expanded their communications with the university community over the last year. This has made the campus community much more aware of and open to communications from OFS. As a result, the number of responses was nearly triple the response number from the prior year. 808 NMSU faculty and staff members responded to the survey and 39.23% (317) of these individuals took the time to write in specific comments that specified areas they either felt needed extra OFS attention or were areas in which respondents felt that OFS was excelling. This included 20 individuals who wrote in comments for OFS instead of identifying which building they worked in at the beginning of the survey. This tells us that a significant portion of respondents felt there were important things that needed to be addressed. For this reason, it is important to look at the comments as well as the raw numbers and percentages of respondents, as the comments will give us a deeper understanding of the issues that OFS may wish to address in the future.

Overall, the results of the survey were favorable, and the majority of respondents had a good opinion of OFS, particularly of OFS staff. When there were issues cited with OFS services, the nature of many of them tended to be specific instances that had caused issues and not larger systematic issues. There were however, a lot of comments that specifically had to do with recent scheduling and staffing changes which many respondents seemed to feel left OFS with too few staff to complete their jobs, and was resulting in some issues in terms of cleanliness and grounds appearance on the NMSU campus. Many of the people who wrote in responses at the end of the survey took time to commend OFS staff for a job well done.

Overall respondents had positive attitudes about the courtesy, knowledge and skills possessed by OFS staff in all areas of the survey. Within the survey, the areas that had to deal with recent cutbacks and schedule changes of custodial and maintenance work tended to have the highest rates of dissatisfaction. There were also specific issues cited with the new OFS work order submittal form and with pricing and contracting of OFS services.

Fall 2010: OFS Customer Satisfaction Survey Results

General Results by Survey Section:

Custodial:

Respondents indicated that overall, they were satisfied with OFS custodial services, and over 50% of respondents indicated that they felt that OFS custodial staff was doing an outstanding job. Respondents were more likely to indicate dissatisfaction with the frequency of cleaning services and with the cleanliness of bathrooms, offices, and classrooms than they were with OFS staff themselves. These sentiments were echoed in the written in comments at the end of the survey, and more comments were written about custodial services and staff than about any other OFS function. Again, the written in comments indicated that respondents felt that OFS staff were doing an excellent job, but that budget and staff cutbacks have left OFS custodial employees overextended without enough time or materials to keep their assigned areas as clean as they should be.

Building Environment and Utilities:

Overall, respondents indicated that they were satisfied with the building environment and utilities provided by OFS in their primary building. However, they were not as likely to have strong positive feelings about this area as they were to have strong feelings about custodial services. As in the prior year's survey administration, when respondents indicated they were dissatisfied with this area, they tended to be the most critical of the temperature and energy conservation measures in their building. Written in comments that tended to relate to this area of the survey echoed this finding, as many respondents indicated dissatisfaction and issues with the regulation of temperature and with the heating and cooling in their primary building. Respondents this year were much more likely to indicate dissatisfaction with the availability of services than they were in prior years. This could potentially relate to several power outages over the last 12 months.

Grounds :

Again, the majority of respondents indicated that they were satisfied with the services that the OFS grounds department was providing on campus. However, in all areas except litter management, respondents were much more likely to indicate dissatisfaction in this area than they were in the prior year. Written in comments dealing with grounds service tended to center around issues with NMSU's sprinkler system or watering schedule, and with jobs left undone or partially done by the grounds department. Several respondents specifically mentioned that they felt that the grounds keeping department was understaffed which they believed was resulting in many areas of the campus being neglected.

Project Development and Engineering:

Overall respondents indicated they were satisfied with the services provided by OFS Project Development and Engineering Staff. However, both in the multiple choice and written in portions of the survey, respondents tended to indicate some dissatisfaction with the communication process involved with this department. Specific instances of poor follow up or feedback, and with coordination between project development and engineering and other OFS

Fall 2010: OFS Customer Satisfaction Survey Results

and campus entities were cited. The Architectural Design area was also singled out as being problematic in the comment section of the survey.

Administrative Services:

Again, the majority of respondents indicated satisfaction with the administrative services provided by OFS. However, respondents were much more likely to indicate dissatisfaction with this area than they were in the prior year. Respondents were also less likely than in the prior year to indicate they were extremely satisfied with staff courtesy in this area. Written in responses relating to this area tended to center on poor communication and follow up by OFS staff, problems with timely follow up to work order requests and inquiries, with pricing that was considered to be high and non-competitive, and with the new work order system. There were multiple respondents who indicated that often a job will not be requested because the work order system is so complex.

Environmental Health and Safety Services :

Respondents who answered the survey questions relating to Environmental Health and Safety Services were likely to indicate they were satisfied with the services being provided. More than 50% of all responses in this area indicated respondents were “Very Satisfied” or “Extremely Satisfied” with EHS services. Written in responses indicated that the campus community felt that this was a good merge with OFS. Issues raised tended to center around communication and timely follow up issues.

Write In Question Summary:

There were a total of 329 written in comments either at the end of the survey or in the building selection box, written by a total of 317 individuals. The most common themes in the write in questions follow. Responses are counted in multiple categories if they dealt with multiple issues. Full text of the responses is found in Appendix C.

- 26% of all written in responses indicated that there were issues with the custodial services provided by OFS. The most common complaints dealt with:
 - The frequency of floor cleaning (vacuuming, mopping, and carpet cleaning) (37%)
 - The cleanliness of the bathrooms (26%)
 - A perceived need for more frequent custodial services overall (24%)
 - A desire for more frequent trash pickup (10%)
 - Custodial staff not being provided with adequate supplies to do their jobs (9%)
 - Unsatisfactory cleaning of stairways and entry areas (7%)
 - Poor quality of cleaning products and bathroom materials(3%)
 - Poor communication as to what custodial staff are cleaning (3%)
 - A custodial schedule that interferes with regular business hours (3%)
 - Unclean shower and locker room areas (3%)

Fall 2010: OFS Customer Satisfaction Survey Results

- Dust control issues (2%)
- Poor work ethics of custodial staff (2%)
- Too few custodial staff (2%)
- Dirty windows (2%)
- The need for respondents to be able to access basic cleaning supplies (2%)
- Lax security concerns of custodial staff (2%)
- Poor communication with custodial supervisory staff (1%)
- The need for more trash cans (1%)
- Inconsistent custodial services (1%)

- 22% of all written in responses took the time to commend OFS staff for doing a good job.
 - 50% of these cited custodial staff as doing an excellent job. Several of these responses singled out specific custodial staff:
 - Michelle (6%)
 - Manny (6%)
 - Antonio(2%)
 - Cindy (2%)
 - Luz(2%)
 - Mike(2%)
 - Roger (2%)
 - Miguel (2%)
 - Luisa (2%)
 - Allen (2%)
 - Tim (2%)
 - Joe (2%)
 - Heating and Cooling / HVAC services were singled out by 7% of these respondents for doing a good job. Of these, three employees were singled out:
 - Jerry V (40%)
 - Erik (20%)
 - Nick (20%)
 - 5% of respondents with answers in this category singled out the following departmental staff as providing excellent services:
 - Electrical
 - Plumbing
 - Grounds and Landscaping
 - 4% of respondents with answers in this category singled out the following departmental staff as providing excellent services:
 - Carpentry
 - Administrative services
 - Other departments singled out for good customer service included:
 - Moving
 - Recycling
 - EHS
 - Sign shop
 - Key/Lock shop

Fall 2010: OFS Customer Satisfaction Survey Results

- There were also multiple OFS employees mentioned by name in the survey as providing excellent service, many of whom were not identified by department. These included:
 - Ralph 'Bud' Jones
 - Tim Dobson
 - Jose Gambon
 - Katrina Doolittle
 - Glen Haubold
 - Robert Ortega and Crew
 - Danny
 - Joe
 - Maria
 - Tino and Crew
 - Dave in electrical
 - Bertha Swarez
 - Henry Saenz
 - Paul Valdiva
 - Robert Bilbao
 - Mike Luchau
 - Stan Dyer
 - Chuck Ryder

Fall 2010: OFS Customer Satisfaction Survey Results

- 16% of all written in responses indicated that there were issues with the grounds services provided by OFS. The most common complaints dealt with:
 - Debris, fruit, or branches not being properly cleaned up (22%)
 - Watering schedule issues or sprinkler issues (20%)
 - Landscaping issues including too much grass, the need for xeriscaping, the need for more native plants (19%)
 - Animal and pest control issues (17%)
 - Trimming and Pruning that is not being correctly done (13%)
 - Lawn maintenance issues (including mowing and pulling weeds) (11%)
 - Air quality and allergy issues caused by blowers and mowing during hours where employees are likely to be outdoors (7%)
 - Issues with the use of blowers (6%)
 - The need to clean up graffiti (6%)
 - Damage to outdoor walkways/stairs/buildings that has not been addressed (6%)
 - Understaffing of the grounds department (6%)
 - OFS vehicles driving on and damaging turf (4%)
 - The need for more outdoor trash receptacles (4%)
 - Ash cans not being emptied (2%)

- 16% of all written in responses indicated that there were issues with the administrative or scheduling services provided by OFS. The most common complaints dealt with:
 - Jobs not being completed in a timely or complete manner (34%)
 - Lack of communication with OFS or a slow response time for work orders (25%)
 - Problems with the new work order process (19%)
 - Costs for services are high/ non-competitive (13%)
 - 4% of respondents in this category indicated they saw the following issues with OFS administrative services:
 - Poor communication regarding financial statements
 - OFS work did not meet industry standards
 - Quotes provided by OFS were not accurate
 - Problems with scheduling services
 - 2% of respondents in this category indicated they saw the following issues with OFS administrative services:
 - Feelings that OFS is more concerned with making money than with taking care of safety hazards
 - Departments being forced to pay for damage caused by OFS workers
 - Poor employee retention
 - Too heavy a paperwork load for projects
 - Frustration that research facilities are supposed to use OFS for construction
 - The Albuquerque center has had issues getting OFS to consult with them
 - In house construction cost ceilings are too low

Fall 2010: OFS Customer Satisfaction Survey Results

- 15% of all written in responses indicated that there were issues with the Facilities and Facilities services. The most common complaints dealt with:
 - Problems regulating temperature in campus buildings (38%)
 - Issues with traffic flow or parking lots (10%)
 - Issues with indoor floors 910% (Note: likely typo for 9%)
 - Mold and leaks (8%)
 - Issues with handicap access (6%)
 - Indoor Air Quality issues (6%)
 - 4% of all responses falling into this category indicated the following facilities issues:
 - Interior building issues not fixed even after multiple requests
 - Poor signage
 - There is a need for more physical resources (classrooms, bathrooms, parking)
 - Building should have hot water
 - Windows are broken
 - Bathrooms are in poor condition
 - 2% of all responses falling into this category indicated they saw the following facilities issues:
 - Strange “plumbing” noises in buildings disrupting class
 - Asbestos exposure
 - Building that should be demolished
 - More need for keys in shared spaces/lecture halls
 - Power outages adversely affecting work
 - Issues with the bike path
 - Buildings in need of paint
- 10% of all written in responses stated that OFS in general was doing a good job. Of these:
 - 15% cited OFS for providing excellent customer service
 - 15% mentioned that the grounds at the NMSU Las Cruces campus look nice
 - 9% said that OFS has greatly improved their service over the last 12 months
 - 9% said that EHS provides excellent service
 - 3% cited the recycling program as being a good program
 - 3% indicated their satisfaction with building maintenance
 - 3% indicated that OFS did an excellent job with a recent building remodeling project
- 9% of all written in responses indicated that they were unhappy with the survey itself. Of these:
 - 35% wanted to see a different scale for answer choices
 - 32% did not feel they had enough information to answer the questions because they had not used OFS services

Fall 2010: OFS Customer Satisfaction Survey Results

- 23% either had concerns about the building list used at the beginning of the survey
- 3% wanted the survey to provide more detail about the different services
- 3% did not like being sent follow-up emails
- 3% felt the questions were too general
- 8% of all written in responses indicated problems with OFS staff. The most common complaints dealt with:
 - Feelings that recent staffing cuts meant that staff could not adequately complete their jobs (44%)
 - Examples of OFS staff exhibiting a poor work ethic (11%)
 - OFS moving services issues (7%)
 - Too many staff showing up for recycling (7%)
 - 4% of responses falling into this category dealt with the following:
 - Reckless driving by OFS staff
 - New schedules for services have limited communication
 - No communication when OFS staff come into offices to complete a work order
 - Perceived unprofessional behavior by staff doing welding
 - The loss of OFS staff because of low pay
 - Feelings that NMSU-A OFS staff are overworked
 - Perceived unprofessional attitude of NMSU-A Facilities Administration
 - Feelings that Robert in Project management was exhibiting poor management skills
 - Perceptions that Glen Haubold and other OFS administration does not respect the staff who work for them
 - The perception that David Shearer has made himself unavailable to meet campus needs
- 3% of all written in responses indicated that they felt there was room for preventing energy waste. Respondents whose answers fell into this category included:
 - 36% who felt that interior lights were being wastefully left on
 - 36% who felt that windows needed to be updated to prevent energy loss
 - 18% who felt that the stadium lights should not be left on at night
 - 9% who felt more needed to be done in general to maintain sustainability
- 3% of all written in responses cited other specific issues with OFS services. Of these:
 - 36% cited problems with the help OFS provided in moving office locations
 - 75% of these indicated that OFS had lost some of their personal possessions in the move
 - 18% felt that the OFS architects were not cooperative or did not offer a competitive skill set when compared to the general market
 - 18% cited specific projects that had been started but never finished
 - 9% said that the lock shop had cut the wrong keys for them
 - 9% felt that the flooding of the streets to clear pipes was a waste of resources

Fall 2010: OFS Customer Satisfaction Survey Results

- 9% felt that services for bicycles are ignored
- 3% of all written in responses indicated that they were felt there were issues with OFS recycling services. Of these:
 - 33% wanted to see more frequent trash pick up
 - 22% felt that there was a need to place more recycling bins around the university
 - 11% complained that trash and recycling were being dumped into the same bin when they were picked up
 - 11% felt that recycling bins were not being appropriately placed
 - 11% wanted to see more cardboard recycling occurring
- 2% of all written in responses indicated that they were felt there were issues with OFS EHS services. Of these:
 - 29% indicated frustration with the way that Haz Com training courses are being scheduled
 - 29% indicated that EHS staff were non responsive or rude when contacted to clean up and take care of some issues with mold
 - 14% felt that lab inspections were not resulting in a timely report of findings
 - 14% indicated displeasure with the group's reluctance to deal with bats in a building
 - 14% felt that EHS was changing rules arbitrarily
- 2% of all written in responses simply indicated that respondents had no comments at this time.

Question by Question Detailed Analysis:

The following is a more detailed analysis of the survey questions. Each question will list the overall percentages and response rates. For those questions about maintenance service, custodial service, and grounds service, a list of buildings that indicated any measure of dissatisfaction with the particular area of OFS service can be found in Appendix B.

Section 1: General Satisfaction Scale

This question read, "How would you rate your overall satisfaction level with the work you have seen completed by the office of facilities and services in the last twelve (12) months?"

Table 1 lists the overall percentage of responses for this question. Overall, respondents indicated they were satisfied with OFS services, and over 52% of respondents indicated they were either "Very Satisfied" or "Extremely satisfied" with the service they had received from OFS

Fall 2010: OFS Customer Satisfaction Survey Results

over the course of the prior year and fewer than 11% of respondents indicated any measure of dissatisfaction with the services provided by OFS.

Table 1: General Satisfaction with OFS, Respondent Percentages

	Extremely Dissatisfied	Very Dissatisfied	Satisfied	Very Satisfied	Extremely Satisfied	Total Respondents
Overall Satisfaction with OFS in last year	2.3%	8.1%	37.2%	36.5%	15.9%	787

Section 2: Primary Building

Question two asked respondents to respond to the following: “In order to better meet your facilities service needs, it is important that we be able to evaluate responses to see which areas of campus may need special attention. With this in mind, please choose your primary building on NMSU from the following drop down list. If your building is not listed, please type the name of your building into the write-in box.”

The following is a listing of the number of responses by each building, and has been updated to include the written in responses.

Fall 2010: OFS Customer Satisfaction Survey Results

Section 3: Custodial Care

The first large set of questions in the survey asked respondents about custodial services provided by OFS in their primary building. The lead-in to this section read:

“OFS provides basic cleaning, recycling, and routine pest control services for Instruction and General Buildings on the Las Cruces Campus. This is done according to a published schedule on the OFS website.

Please rate your level of satisfaction with the following custodial care areas as they pertain to the building you identified as your primary building.”

Table 2 lists the areas that respondents were asked about as well as the percentages of responses for each question. In all cases, more than 50% of respondents indicated they were “Very” or “Extremely” satisfied with OFS custodial services. Over 50% also indicated that they were very satisfied with custodial staff. When respondents indicated dissatisfaction with custodial services, they were most likely to be dissatisfied with the frequency of custodial services and with the cleanliness of restrooms.

Table 2: Satisfaction with OFS Custodial Services, Respondent Percentages

	Extremely Dissatisfied	Very Dissatisfied	Satisfied	Very Satisfied	Extremely Satisfied	Number of Responses
Cleanliness of Public areas (entryways, lobbies, lounges etc.)	1.5%	6.0%	33.5%	30.2%	28.7%	781
Cleanliness of Restrooms	3.6%	8.2%	35.4%	26.1%	26.7%	779
Cleanliness of offices/classrooms	1.8%	8.7%	37.2%	28.5%	23.8%	761
Courtesy of Custodial Staff	0.8%	1.7%	19.6%	27.9%	50.1%	771
Frequency of Custodial Services	3.6%	10.3%	32.8%	25.1%	28.1%	768
Overall Quality of Custodial Services	1.9%	7.7%	32.9%	29.0%	28.4%	778

Because custodial services are specific to each building on campus, it is also important to look at those buildings where respondents indicated some measure of dissatisfaction with custodial services at NMSU. Please see Appendix B.1 for this breakdown.

Fall 2010: OFS Customer Satisfaction Survey Results

Section 4: Building and Environment

The next large survey section asked respondents questions about the building environment and utilities services in their primary campus building. The beginning of this survey section told respondents:

“OFS strives to maintain a comfortable and functional environment for all members of the NMSU community.

Please rate your level of satisfaction with the following building and environmental utilities areas of the building you identified as your primary building.”

Table 3 lists the areas that respondents were asked about as well as the percentages of responses for each question. In all cases, more than 50% of respondents indicated they were at least satisfied with the building and environmental utilities provided by OFS, though respondents were much less likely to indicate high levels of satisfaction with these areas than they were to indicate similarly high satisfaction levels with custodial services. When respondents indicated dissatisfaction with this area, it was most likely that this was related to temperature or energy conservation. Respondents were much more likely than in prior years to indicate their dissatisfaction with the availability and reliability of utility services, which could be related to several large power outages during the past 12 months.

Table 3: Satisfaction with OFS Building Environmental and Utilities Services, Respondent Percentages

	Extremely Dissatisfied	Very Dissatisfied	Satisfied	Very Satisfied	Extremely Satisfied	Number of Responses
Temperature	2.7%	15.7%	47.0%	22.8%	11.8%	781
Lighting (is it adequate for the task)	0.9%	6.5%	44.1%	30.0%	18.5%	780
Handicap Access	2.4%	6.8%	46.4%	26.4%	18.1%	755
Availability and Reliability of utilities (electrical power, heating, cooling meet our needs and have minimal interruptions)	2.1%	9.3%	40.3%	29.5%	18.9%	774
Energy conservation	3.8%	12.4%	49.3%	22.5%	12.0%	766

Because environmental and utilities services are specific to each building on campus, it is also important to look at those buildings where respondents indicated some measure of dissatisfaction with these services at NMSU. Please see Appendix B.2 for this breakdown.

Fall 2010: OFS Customer Satisfaction Survey Results

Section 5: Grounds Services

The third large survey section asked respondents questions about OFS provided grounds service at NMSU. The beginning of this survey section told respondents:

“OFS provides landscape and grounds maintenance, exterior trash receptacle management and concrete and asphalt maintenance. In addition OFS maintains the walkways and roadways around campus and is responsible for the care of lawns, trees, and shrubs. OFS is also funded to maintain campus drainage systems.

Please rate your level of satisfaction with the following areas as they relate to OFS grounds maintenance in your area of the university.”

Table 4 lists the areas that respondents were asked about as well as the percentages of responses for each question. In all cases, more than 75% of respondents indicated they were at least “satisfied” with these areas. In only two cases, that of pest control and of management of recycling and recycling receptacles, did more than 10% of respondents indicate they were dissatisfied with the services provided. In all areas except litter management, respondents were more likely to indicate dissatisfaction with this area than in prior years. Most notably, the dissatisfaction rates for landscape design and management, maintenance of grounds, and overall quality of services were significantly higher than the prior year’s administration.

Table 4: Satisfaction with OFS Grounds Services, Respondent Percentages

	Extremely Dissatisfied	Very Dissatisfied	Satisfied	Very Satisfied	Extremely Satisfied	Number of Responses
Maintenance of grounds (mowing, weeding, trimming, edging, etc.)	1.4%	6.1%	35.6%	32.4%	24.5%	787
Quality of landscape design and maintenance (trees, flowerbeds, etc)	1.8%	7.5%	34.7%	31.0%	25.0%	784
Litter management	2.2%	6.8%	40.4%	30.2%	20.4%	765
Management of recycling / recycling receptacles	2.3%	8.1%	37.7%	28.6%	23.3%	780
Quality of pest control (indoors and outdoors)	2.7%	10.2%	43.8%	25.2%	18.1%	778
Overall quality of grounds services	0.9%	4.9%	40.1%	32.4%	21.8%	781
Courtesy of Grounds staff	0.6%	1.0%	32.9%	32.4%	33.0%	775

Fall 2010: OFS Customer Satisfaction Survey Results

Because grounds service is specific to varied areas of campus, it is also important to look at those buildings where respondents indicated some measure of dissatisfaction with the services provided by the OFS grounds crew. Please see Appendix B.3 for this breakdown.

Section 6: Project Development and Engineering

The fourth large section of the survey asked respondents questions dealing with special projects and engineering services that may have been provided by OFS offices over the course of the prior year. This section was introduced to respondents with the following text:

“Facilities modifications and enhancements are provided on a reimbursable bases when requested by the user. Please evaluate the former Facilities Planning and Construction group if you have used their services.

In the last twelve (12) months, have you/ your office utilized any of these types of projects and engineering services?”

786 respondents answered this question. Of those, 73.4% indicated they had not used OFS special projects or engineering services in the prior year, and were directed to the next survey section. The 26.6% of respondents who indicated they had utilized OFS project development or engineering services were asked to rate their satisfaction level with the listed OFS Project Development and Engineering areas. Over 75% of all respondents indicated that they were satisfied with Project Development and Engineering Services, though respondents were less likely to indicate higher levels of satisfaction with these processes than with Custodial services. Overall respondents were more likely to indicate they were dissatisfied with these services than last year’s respondents were. Over 20% of all respondents indicated they were dissatisfied with how on time and on budget these projects were and with how well they were kept informed about the project. Table 5 shows a breakdown of responses for this section.

Section 7: OFS Administrative Services

The fifth large section of the survey asked respondents questions regarding their experiences with the project administration side of OFS. The section lead-in read:

“In the last twelve (12) months, have you had contact with OFS business office staff regarding the administrative side of any Maintenance project or Special Projects or Engineering Work (i.e. Scheduling, Purchase orders, cost and/or payments)?”

776 respondents answered this question. Of those, 75.8% indicated they had not used OFS special projects or engineering services in the prior year, and were directed to the final write in option on the survey. The 24.2% of respondents who indicated they had been in contact with OFS regarding the specified administrative type functions were asked to rate their satisfaction level with the listed OFS Administrative areas. At least 40% of respondents to this question indicated they were “Very Satisfied” or “Extremely Satisfied” with OFS Administrative services. Respondents were the most likely to indicate dissatisfaction with the timeliness of follow ups. Table 6 shows a breakdown of responses for this section.

Knowledge / Skill of OFS staff	2.5%	6.1%	28.9%	35.0%	27.4%	197

Section 8: Environmental Health and Safety

The final large section of the survey dealt with issues relating to Environmental Health and Safety services. This is a group that was placed under OFS over the course of the last year. This survey section is an expansion of the maintenance section in the prior year's survey. The introduction to this section read:

“EHS is responsible for facilitating University safety by implementing programs that will serve the students, employees and clients within the state. The objectives of NMSU's safety policy are top prevent personal injury or death, to reduce costs caused by inadequate safety procedures and to reduce environmental pollution.

EHS fulfills its mission to make NMSU a safe environment by implementing programs and services in eight major areas: Education, Training and Protective Equipment, hazardous Waste and materials Management, Health and Safety Inspection/ Faculty Audits/ Activity and Work Reviews, Regulatory Compliance, Accident and Exposure Investigations, Exposure Prevention/Indoor Air Quality, Radiation Licensing & Permitting, and Safety Standard & Procedures.”

Fall 2010: OFS Customer Satisfaction Survey Results

Because there was the potential that not all respondents would have utilized these services in the last year, respondents were first asked the following:

“In the last twelve (12) months, have you/ your office utilized EHS Services?”

789 respondents answered this question. Of those, 66.0% indicated they had not used OFS Environmental Health and Safety services in the prior year, and were directed to the next survey section. The 34.0% of respondents who indicated they had utilized OFS EHS services were asked, “Please rate your satisfaction level with EHS Services.”

In all cases, more than 50% of respondents indicated they had high levels of satisfaction with these areas. In only one case, that of follow-up communications, did more than 10% of respondents indicate they were dissatisfied with the services provided. Table 7 lists the areas that respondents were asked about as well as the percentages of responses for each question.

Table 7: Satisfaction with Environmental Health and Safety, Respondent Percentages

	Extremely Dissatisfied	Very Dissatisfied	Satisfied	Very Satisfied	Extremely Satisfied	Number of Responses

Fall 2010: OFS Customer Satisfaction Survey Results

Final Question: Write-In

The final question on the survey awarded respondents the opportunity to write in any comments, questions, or suggestions they had about OFS services. The text for this question read:

“If you have any further concerns or comments regarding the work provided by OFS or recommendations for services you feel OFS should explore providing in the future, please feel free to share them here.”

Because there exists the potential for different buildings to have different needs, a summary of responses by building can be found below. Respondents who wrote answers to this question in the initial building write in box are counted here as well. Numbers in parenthesis indicate the numbers of written in responses falling into this category, no number means just one person answered this way. Responses are counted in all categories they fall into.

Appendices

Appendix A: Survey Form

This is the 2nd annual Office of Facilities and Services (OFS) Customer Service Survey. Because the Office of Environmental Health and Safety (EHS) and the Office of Facilities Planning and Construction (FPC) were integrated into a single work unit with OFS on July 1, 2010, questions about services provided by all three organizations are included.

Customer service is a key component of effective facilities management, and it is important to OFS that our customers feel that their needs are heard, understood, and acted upon. The OFS commitment to continuous improvement is meaningless without input from you, and we would like for you to tell us how we are doing.

We are asking that NMSU employees take 5-10 minutes to fill out this survey to help us determine how we can better meet the needs of the NMSU community. Please complete those sections applicable to any services that you are familiar with; for example, Community Colleges and Agricultural Science Centers may have only used FPC and/or EHS services in this past year.

Please be honest. This survey is used to guide our initiatives, and the results are reported to APPA, our professional organization. The survey summary and scores will be published, and last year, there were so many positive comments received about Ron Tarazoff that he received the Strickland Award for excellent customer service in OFS.

The survey will be available until Friday, October 8, 2010. All responses to this survey are anonymous. For questions about this survey, please contact Glen Haubold, 646-2101, ghaubold@nmsu.edu

For each question, please choose the answer you feel best represents your view. Feel free to provide additional information or suggestions on how OFS can improve their services in the write in box at the end of the survey

We greatly appreciate you taking the time to complete the OFS Customer Satisfaction Survey.

How would you rate your overall satisfaction level with the work you have seen completed by the office of facilities and services in the last twelve (12) months?

- Extremely Satisfied
- Very Satisfied
- Satisfied

- Very Dissatisfied
- Extremely Dissatisfied

In order to better meet your facilities service needs, it is important that we be able to evaluate responses to see which areas of campus may need special attention.

With this in mind, please choose your primary building on NMSU from the following drop down list. If your building is not listed, please type the name of your building into the write-in box.
